

A REFRESH ON THE ORIGINAL OIL-SEALED VACUUM PUMP

RFL 102

- Identical performance to the RFL 100 you trust: delivering a continuous 24 inHg and 417 cfm at free air
- A more compact and cost-effective unit due to a new, improved manifold and 4-way valve
- 16% higher cfm per horsepower drawn versus the competition—a more efficient unit—easier on your fuel bills
- Higher maximum continuous rpm offers a massive 100 cfm advantage over the competition operating at 20 inHg vacuum
- Uses 1/3 the oil! The RFL 102 sips a meager 5.1 oz/hr, compared to competitive units at 15.0 oz/hr
- The same rebuild kit can be used for the RFL 100, eliminating the need to carry extra inventory
- Gardner Denver/Wittig is partnered with some of the world's best vacuum equipment packagers, and we are ready and willing to work with them and you to develop a custom package to meet the unique needs of your fleet

THE WITTIG RFL102
IS THE CLEAR &
OBVIOUS CHOICE FOR
THE FUEL, TIME, &
EXPENSE-CONSCIOUS
FLEET OWNER
