

FRUITLAND

Vacuum Pump Packages and Systems

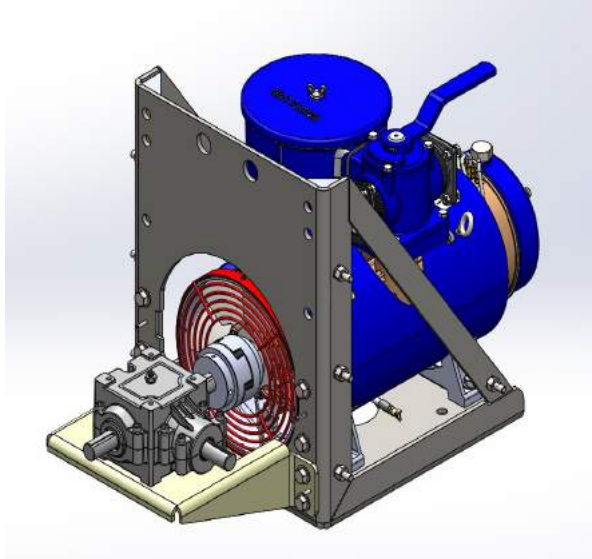

The **Fruitland® Eliminator series** offers the reliability and power of the Fruitland® pump, combined with the ease and simplicity of our “Ready2Rig” Pump Mounts. We offer several design options to help you tailor your Eliminator package.

Join us in this journey to design, build, shape and create a **Future Together.**

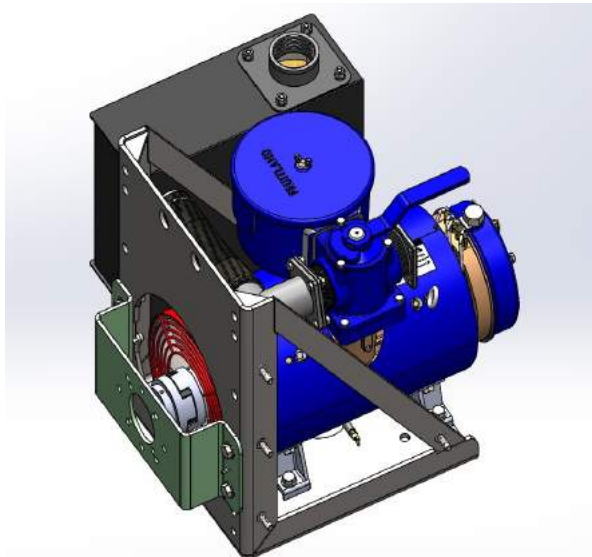

Mounting Options:

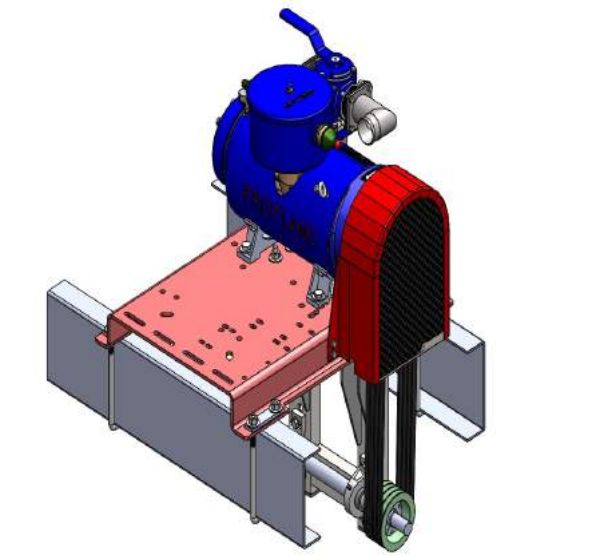

A-Gearbox Drive Options

- This option is designed to mount on the truck frame and connect to the PTO shaft. It comes with an angle gearbox mount and a right angle drive gearbox.
- Secondary shutoff, muffler assembly, coupling and valves are available depending on the ELIM configuration and pump type.
- Contact an authorized dealer or our technical support team for more information.

H-Hydraulic Drive Options

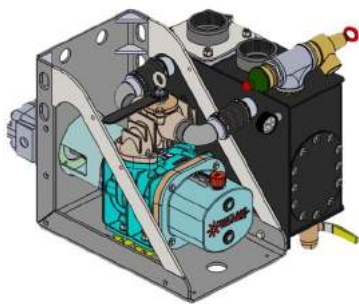

- This option is designed to mount on the truck frame and connect to the truck's hydraulic system. It comes with a hydraulic motor mounting bracket.
- The hydraulic motor is optional. For the right motor size refer to the manual or contact an authorized dealer or our technical support team.
- Secondary shutoff, muffler assembly, couplings and valves are available depending on the ELIM configuration and pump type.

TB-TH-SB- Top & Side Frame Mount Options

- This option is designed to mount on top or on the side of the truck frame and connect to the PTO through belts (TB), or to the hydraulic System (TH).
- Includes a top frame bracket for the truck, and a belt drive (TB) or hydraulic motor (TH) drive brackets.
- Muffler assembly, couplings and valves are available depending on the ELIM configuration and pump type.

Models:

ELIM 172 SERIES

- 127 CFM free air flow.
- Suited for use on small & medium truck applications

ELIM 344 SERIES

- 218 CFM free airflow.
- Suited for use on small & medium truck applications

ELIM 870 SERIES

- 501 CFM free airflow.
- Suited for application on medium and large trucks

ELIM 250 SERIES

- 166 CFM free airflow.
- Suited for use on small & medium truck applications

ELIM 500 SERIES

- 338 CFM free airflow.
- Suited for use on medium and large trucks

ELIM LIQUID RING SERIES

1470 to 2393 CFM free airflow. Suitable for pumping gases & vapors with very little isothermal compression of gases.

Eliminator Package Nomenclature:

ELIM TBM-SM500LUF

MODEL

ELIM - Eliminator Series

DRIVE OPTIONS

A - Right Angle

H - Hydraulic

TBR - Top Frame Mount Belt (Regular Kit)

TBM - Top Frame Mount Belt (Mack Kit)

THR - Top Frame Hydraulic (Regular Kit)

THM - Top Frame Hydraulic (Mack Kit)

SB - Side Mount Belt

COMPONENTS

BLANK - Bracket Only

S - Secondary

M - Muffler

M02 - Round Muffler

**SMF - Secondary Muffler Filter Combo
(172, 250, 344)**

PUMP ORIENTATION

BLANK - No Vacuum Pump

L - Left Rotation

R - Right Rotation

U - Top Valve

S - Side Valve

F - Filter Housing

H - Hydraulic

SS - Side Valve Special

PUMP OPTIONS

BLANK - No Vacuum Pump

172 - RCF 172 Pump

250 - RCF 250 Pump

344 - RCF 344 Pump

500 - RCF 500 Pump

870 - RCF 870 Pump
